EDUCATION

B.S. Actuarial Science · University of Wisconsin–Eau Claire

Expected May 2029

- Entered with 34 dual-enrollment college credits
- Dual-enrollment GPA 3.92
- Fall 2026: Introduction to Computer Science, Calculus I, Introduction to the Actuarial Career, and Business Communication — Writing, Speaking and Collaborating

High School Diploma · Cadott High School

May 2026

- GPA 3.90 unweighted, 4.25 weighted
- ACT: 36 on the mathematics section
- High honor roll every semester

EXPERIENCE

Accounting Tutor · Peer tutoring

High school

- Tutored high-school accounting: the accounting equation, journal entries, trial balances and the three financial statements.
- Most of the work was finding where somebody's mental model had gone wrong rather than re-explaining the procedure, which is roughly what I now do when a backtest disagrees with me.

Deli & Food Court Team Member · Festival Foods

June 2024 – Present

- Help forecast weekly product demand and place replenishment orders for the department — judging how much of an item will sell against how much will be thrown away. Inventory, not finance, but the trade-off is the same one.
- Cross-trained on every station and regularly cover shifts on short notice — a reliability record now supporting a pursuit of a deli lead role.

LEADERSHIP & AWARDS

Team Captain · Finance & Investment Challenge Bowl

2024 – 2026

- Led a three-person team to a first-place regional finish, advancing to the Wisconsin state competition.

Founder, President & Host · Cadott High School Debate Club

2025 – 2026

- Founded the school's debate club from nothing: recruited the members, found an adviser and set the format.

Founder · Cadott High School Math Club

2025 – 2026

- Started the school's math club and built its first membership.

National Qualifier · Future Business Leaders of America

2024 – 2026

- Placed 5th in Insurance & Risk Management at the Wisconsin State Leadership Conference, qualifying for the National Leadership Conference.

Delegate · Badger Boys State

2025

- Selected to attend Wisconsin's American Legion programme in government, where delegates build and run a mock state government over a week.

Web Redesign (pro bono) · Cadott Community Association

2025 – 2026

- Redesigned the association's website as a Programming Club project — unpaid, for an organisation that had no budget for it.

SKILLS

ANALYSIS Investment & equity research, Backtesting & simulation design, Inventory forecasting, Google Sheets

TECHNICAL Python — pandas, yfinance, Defining and testing what I build, Data cleaning, Excel (basic, improving)

OTHER Customer service, Typing 100–110 WPM

On the technical work: I design the system, decide what it has to prove, and write the tests that try to break it. A lot of the Python itself I write with AI assistance — I read it, run it, debug it and can tell you why every part is there, but I am not going to claim I typed all of it from memory. The 280+ automated checks in the backtester are the part I care about, because they are what makes the results mean anything.
